1 TECHNOLOGY INTEGRATED STRATEGIES IN THE CLASSROOM

TECHNOLOGY INTEGRATED STRATEGIES IN THE CLASSROOM

Technology **opens up** new **opportunities** for **collaboration** and student **participation**. **Communication mediums**, such as email, **allow** students to communicate more often when working together on a project. Some technological forms are more **conducive to** collaboration, such as wikis, which are online documents that anyone can **edit**. Also, social networking **tools encourage bashful** students to **take part in** online activities, since they can **manage** their **anxiety** when communicating more easily. Paul Harvey, a history professor at University of Colorado, uses blogs to encourage students to post questions, **comments** and **grievances** toward authors read in class. Overall, technological **integration** in the classroom can **increase** student **engagement**, since students are **accustomed to interacting with** technology outside the classroom and experience a disconnect between school and the outside world.

Teacher-Student Interaction

Technology gives teachers more opportunities to interact with students. Teachers can communicate with students through videoconferencing, which helps the teacher to send both verbal and nonverbal signals. Teachers can also **create** podcasts that students can download, which allows students to **review** class content and allows teachers to give students **individualized** advice.

Internet Literacy

Teachers can help students **develop skills** helpful when using the Internet. Online technologies sometimes have security and safety **concerns**, since students are often interacting anonymously with other people. Not only can students meet people of questionable character, but they also can **encounter** information on websites that **lack credibility**. Teachers can help students learn research and critical thinking skills that allow them to **distinguish reliable** sources from **biased** ones.

Multiple Learning Styles

Students have **varying** learning styles they find ideal. Some students learn more easily by hearing verbal instructions, while other students must see something to understand it. Technology increases the number of ways that educators can teach students by creating more dynamic visuals, such as computer simulations **depicting** the water cycle in a science class.

EXERCISES

A. Match the words with their synonyms.

1. biased	A. complaint
2. credibility	B. prejudiced
3. distinguish	C. favorable
4. grievance	D. show
5. individualized	E. believability
6. participation	F. permit
7. encounter	G. personal
8. allow	H. differentiate
9. conducive(to)	I. run into
10. depict	J. involvement

B. Choose the word which has the closest meaning to the words underlined.

1. **We should be *accustomed to* death because it's something that's going to happen to every single one of us.**

A. shy B. personal C. dependable
D. used E. helpful

2. **Employees perform best when their environment is *conducive to* growth.**

A. bashful B. contributive C. individualized
D. varied E. reliable

3. **In his first five years on the faculty, he *reviewed* more than a hundred new books, published several important articles in scholarly journals.**

A. discriminated B. made C. rose
D. encountered E. revised

4. **Some children hide their *anxiety* because it is too difficult for them to express it to others.**

A. worry B. ability C. reliability
D. grievance E. involvement

5. **The first thing one must do to *manage* stress is to identify the source of the stress.**

A. lack B. administer C. create
D. promote E. depict

6. **Since the Industrial Revolution, human activity has *increased* the amount of greenhouse gases in the atmosphere.**

A. developed B. interrelated C. augmented
D. permitted E. represented

7. **Over the next five years, Peru has an *opportunity* to achieve sustained, high economic growth and significant social development.**

A. chance B. concern C. anxiety
D. credibility E. literacy

8. **The government has *allowed* women to engage in commercial activities.**

A. discriminated B. administered C. promoted
D. increased E. let

9. **The *participation* of children in the research, design, and development of educational new technology has gained popularity in recent years.**

A. grievance B. literacy C. involvement
D. tool E. comment

10. **The scale is *reliable* because it consistently reports the same weight every day.**

A. trustworthy B. shy C. biased
D. helpful E. prejudiced
